EXPERIENCE

Senior Backend Engineer, Fenwick Systems

Mar 2021 - Present

- Design and build scalable REST APIs and backend services using Node.js, Express, and TypeScript for high-volume marketing and promotion platforms.
- Lead code reviews and mentor engineers on architecture decisions and best practices.
- Own the deployment pipeline and coordinate releases across four product teams.
- Reduced average API latency from 420ms to 110ms across core services.
- Cut infrastructure costs by 18% by consolidating redundant services.

TECHNICAL SKILLS

BACKEND

Node.js Express TypeScript

FRONTEND

React HTML CSS

DATABASES

PostgreSQL MongoDB Redis

DEVOPS AND CLOUD

Docker AWS Jenkins
